

Transshipment

Transshipment or **Transhipment** is the shipment of goods or container to an intermediate destination, and then from there to yet another destination.

One possible reason is to change the means of transport during the journey (for example from ship transport to road transport), known as transloading. Another reason is to combine small shipments into a large shipment, dividing the large shipment at the other end. Transshipment usually takes place in transportation hubs. Much international transshipment also takes place in designated customs areas, thus avoiding the need for customs checks or duties, otherwise a major hindrance for efficient transport.

Transshipment

Transshipment or **Transshipment** is the shipment of goods or container to an intermediate destination, and then from there to yet another destination.

One possible reason is to change the means of transport during the journey (for example from ship transport to road transport), known as transloading. Another reason is to combine small shipments into a large shipment, dividing the large shipment at the other end. Transshipment usually takes place in transportation_hubs. Much international transshipment also takes place in designated customs areas, thus avoiding the need for customs checks or duties, otherwise a major hindrance for efficient transport.

Note that transshipment is generally considered as a legal term. An item handled (from the shipper's point of view) as a single movement is not generally considered transshipped, even though it may in reality change from one transport to another at several points. Previously it was often not distinguished from transloading since each leg of such a trip was typically handled by a different shipper.

Transshipment is normally fully legitimate and an everyday part of the world's trade. However, it can also be a method used to disguise intent, as is the case with illegal logging, smuggling or grey market goods.

Nowadays, Transshipment is the best way to avoid anti-dumping duties. Now, we will tell you how it helps you to avoid anti-dumping and how it reduces your cost.

As we know, your country doesn't charge high tariffs for all the country but China. Now we can help you to provide the documents to your government certifying that the products are made of other low tariff countries instead of China.

How can we do it?

1st: We need to export those products(made in China) to other country (just as Malaysia). It is easy for us to do it and which just need cost your little money.

2nd: We will finish custom clearance for those cargos in Malaysia and then send it to our warehouse. Picking up those to re-load it to the new container(booking with Malaysia).

3rd: Finding a local factory to provide all the original documents to your country. And then export the products to your instruction Post.

After the operation of above, the original will be changed from China to Malaysia. You just need to pay the normal import duty.

We are experienced in it for many years, and we are confident that we have the ability to help you to lower the import tariff. You are welcomed to contact us if you are fond of our service
